

**The following bulls have SNP files stored at CLRC/Neogen as of June 1, 2022
 Their progeny are eligible for registration. If you are using AI sires from France not listed
 below please contact CLRC and the SNP files can be requested from France.**

WILLOW CREEK COMMANDER	D 5942	WW CORBY	R 4575

As of June 1, 2022 the following bulls have DNA samples stored at CLRC/Neogen. In order for their Fullblood (R) or Embryo Transplant (T) progeny to be eligible for registration these sires require a SNP test. The stored DNA samples may be able to be used to complete a SNP test, but in some cases the stored sample does not work and a new sample will need to be sent (in this case semen).

***** Floe II is not registered in Canada (USA registered) and would also require registration for his offspring to be eligible for registration.

As of June 1, 2022 the following bulls have been collected for owners use semen. Only owners of the bull, or members of the sires syndicate may USE or STORE this semen as per the CFIA. If you are not an owner or syndicate member, and you use this semen, any resulting offspring will be ineligible for registration.
